Richard Thorgierdson worked for our company for 9 years from September 2012 to July 2021 as an IT specialist. In that time, he created a number of custom programs to help streamline company procedures and improve performance to the great benefit of the company. He supported the staff with all of their needs, his many years of experience in IT was very evident.

He saw us through a migration in accounting software and server hardware over the years. He was an integral part of the team, and we were sad to see him go. His attention to detail and ability to create what the company needed in custom software was excellent.

Since that time Betterview Software has supported the company with ongoing support as needed. This continued support has been very beneficial in the business ongoing operations.

Conrad Lefurgey, CPA, CGA
Finance Manager
Gateway Group
